

Hydroxychloroquine prevention of COVID-19

We are looking at whether hydroxychloroquine prophylaxis can protect healthcare workers from catching COVID-19

Participants will take hydroxychloroquine or placebo tablets for 3 months and attend monthly visits for a maximum of 5 months

Participants must have a smart-phone

Are you a nurse, doctor, therapist, dietitian, cleaner, porter, food service worker, phlebotomist, ambulance worker, radiographer, laboratory staff or other worker in the hospital and interested in taking part?

If so, register your interest through the study website www.copcov.org, and your local study team will be in touch.
